

ViaWest Security Solutions

The best security solutions will be useless if you are unable to keep your equipment safe. ViaWest facilities have been SAS70 Type II audited since 2006 and all our enterprise-class data centers are designed to offer on-site 24x7x365 support in a setting that delivers enterprise-class redundancy, performance and security.

Experienced, On-site Support

- > ViaWest's nine mirrored NOCs, staffed 24x7x365 with experienced engineers
- > Geographically dispersed support staff
- > The NOC staff conduct around-the-clock rounds to inspect the facilities, infrastructure, and customer environments
- > The NOC ensures all individuals are properly identified with assigned badges

Multilayered Physical Security

- > 24x7x365 magnetic card key access with secondary biometric or pin code entry
- > Digital, motion activated security cameras and intercom systems
- > All access to the data center is logged and is under constant video surveillance
- > Combination lock access on all customer cabinets
- > Biometric access control options available to customers
- > ViaWest maintains 90+ days of rolling access log data on facility entries

ViaWest Security Solutions give you the security expertise and around-the-clock support you need to ensure the safety of your mission-critical applications. You can rely on ViaWest to design, implement and manage the security services that make the most sense for your unique business needs.
